Verify Java and Find Out-of-Date Versions

Check to ensure that you have the recommended version of Java installed on your Windows computer and identify any versions that are out of date and should be uninstalled.

Agree and Continue

By clicking Agree and Continue, you acknowledge that you have read and accepted the [license terms](#) for the verify and find old versions feature.

After clicking the button, the Java detection app will ask for permission to run. Click **Run** to allow the application to continue.

If you recently completed your Java software installation, **restart your browser** (close all browser windows and re-open) to **enable the newly installed Java version** in the browser. Javascript must also be enabled.

If you prefer to simply verify your Java version and not accept the license terms, you can do so from the [verification page](#).
